

The New Open Bore MRI That Accommodates *Everyone*

Experience the most comfort and openness in MRI with the **MAGNETOM Espree**.

Larger patients are often referred to conventional Open MRIs due to capacity. However, traditional Open MRIs are much less powerful and produce lower quality images for your physician. But now you don't have to sacrifice diagnostic accuracy for comfort. The Espree's extra-large Open Bore accommodates patients of all sizes and is perfect for those who get anxious during an MRI. Due to its short design, most exams can be done with your head outside of the system. No other MRI can offer that. Most importantly, its high power delivers the best images for the best care.
